OBJECTIVES AND METHODS

The U.S. Army Environmental Center (AEC) tasked the Mandatory Center of Expertise for the Curation and Management of Archaeological Collections (MCX) with the job of assisting Army installation personnel in complying with the requirements of the Native American Graves Protection and Repatriation Act (P.L. 101-601, NAGPRA). The MCX was asked to locate and assess archaeological collections derived from Army-owned lands, to identify the federally recognized Native American tribes most likely culturally affiliated with the collections, to draft Section 6 Summary Letters for each installation, and to conduct physical inventories of any collections that contain human skeletal remains. This report conveys the results of the collections research completed to assist Savanna Army Depot in complying with the Section 6 Summary requirements of NAGPRA.

The MCX used a two-stage process to identify, locate, and assess the contents of archaeological collections from the installation. First, archival research was performed to review all archaeological site records and reports for the installation. Second, telephone interviews were conducted with personnel at installations, universities, museums, and archaeological contractors that were identified during the archival research as possible repositories of Army collections.

Archival research for Savanna Army Depot began with a search of the National Archeological Data Base (NADB) for references pertaining to the installation. This was followed by a thorough examination of all archaeological site forms and a literature review of all pertinent archaeological reports and manuscripts on file at both the Illinois State Museum in Springfield, Illinois and the Illinois State Historic Preservation Office (SHPO) in Springfield, Illinois. The records search was performed at the Museum and the SHPO in December 1994 and sought to identify any work on the installation that may have produced archaeological collections.

Subsequent telephone interviews to potential collections repositories ascertained whether the materials were present and the range of objects in each collection. Once the collections were located and assessed, MCX personnel identified federally recognized Native American tribes that are likely to be culturally affiliated with the materials in the collections. Draft Section 6 Summary letters are enclosed for each of these tribes (Appendix I), as well as a listing of the current tribal chairperson (Appendix II).

RESEARCH RESULTS

ARCHAEOLOGICAL INVESTIGATIONS AT SAVANNA ARMY DEPOT

No archaeological surveys or excavations have been conducted on the Savanna Army Depot since before World War II; however, five archaeological sites have been recorded on the facility. A portion of one site, 11-Jd-9, was excavated sometime before 1900 by W. B. Nickerson of the University of Chicago, prior to the commissioning of the post in 1917, therefore collections associated with this excavation do not fall under the responsibility of the Army.

Based on Stafford et al. (1984), the Spensely Mound site (11-Jd-119) was recorded and collected by the Illinois State Museum sometime in the 1930's. Artifacts from this site consisted of several fragments from a single prehistoric bowl probably related to the Mississippian Period.

Three other sites were recorded on the Savanna Army Depot in Carroll County: 11-Ca-1, 11-Ca-2, and 11-Ca-3. The Savanna Proving Ground Site, 11-Ca-1, was recorded and test excavated in 1932 by Robert Adams of the University of Chicago. The site form from 11-Ca-1 stated that a burial was encountered during excavation of a trench, therefore the possibility exists that NAGPRA related items could have been collected from this site. Site 11-Ca-2, recorded by the Illinois Archaeological Survey, consisted of a Mississippian habitation site, identified by pottery fragments eroding out of a stream bank, and a mound overlooking the Mississippi River. Site 11-Ca-3, also recorded by the Illinois Archaeological Survey, is reported as a prehistoric mound with no associated artifacts and an unknown chronological period.

SUMMARY OF ARCHAEOLOGICAL COLLECTIONS

A total of 19 ft³ of boxed archaeological materials and associated documentation has been identified for Savanna Army Depot. As of the date of this report, they are located at the following repository:

Illinois State Museum, Springfield, Illinois

The attached *Summary of Current Locations of Archaeological Collections from Savanna Army Depot* (Appendix III) provides detailed information about each collection derived as a

result of archaeological investigations at the installation. A collection consists of all of the materials, artifacts and associated documentation (e.g., field notes, maps, photos, data analyses, correspondence), produced as a result of an archaeological investigation or project at a single site or multiple sites. In some cases, the same archaeological site may have been investigated by various individuals or organizations. Depending on where the resulting collections are curated, they may be stored and identified as separate collections or separate components of a single collection. In cases where the artifacts and records have become separated, we list the records collections repository as well. Every attempt has been made to locate all collections cited on available archaeological site records or in published and unpublished references to archaeological investigations on the installation.

The Illinois State Museum (ISM) contributed a complete catalogue of their collections (collection accession number CA-226) from the Savanna Proving Ground site (11-Ca-1) (Appendix IV). The museum believes that the collections from 11-Ca-2 and 11-Jd-119 are stored among its general collections and lack separate accession numbers.

No funerary objects were identified in a thorough review of the archaeological records, associated literature, and telephone interviews. The final examination of sacred objects or objects of cultural patrimony may be established by the associated Native American tribes (if determined to be culturally affiliated and the objects meet the definitions and restrictions specified in NAGPRA) upon further deliberation.

REFERENCES TO ARCHAEOLOGICAL INVESTIGATIONS

Two sets of references regarding archaeological work conducted on Savanna Army Depot are attached: Appendix V contains the list of references reviewed by the MCX during its archival research; Appendix VI is the list of references contained in the National Archeological Data Base (NADB).

NATIVE AMERICAN TRIBES ASSOCIATED WITH SAVANNA ARMY DEPOT

Potential cultural affiliation was not provided on any of the site forms or project reports examined by the MCX for the Savanna Army Depot. However, according to numerous sources at the time of European contact, five Native American groups, the Mascouten, the Sauk, the Fox, Miami-speaking tribes, and the Winnebago inhabited the lands in the vicinity of the area now occupied by the Savanna Army Depot (Callender 1978, Goddard 1978, Tanner 1987, Waldman 1988).

The Mascouten were a semi-sedentary Algonquian tribe that lived during the earlier historical period mainly in southern Michigan and Wisconsin and in northern Indiana and Illinois. However, after considerable moving about and a sharp decline in population the Mascouten lost their separate identity and became part of the Kickapoo tribe sometime after 1800 (Goddard 1978:668).

According to Callender (1978:681), Miami-speaking tribes also occupied the area around the southern end of Lake Michigan from the Saint Joseph River to northern Illinois during the early contact period and probably for some time before. This tribal territory encompasses the area now occupied by the Savanna Army Depot (Callender 1978:681).

Additionally, the Sauk Indians and the Fox Indians since becoming allies in 1734, lived together or in close proximity to each other in a territory spanning between the Wisconsin River and the Rock River in Illinois (Waldman 1988:211), in the vicinity of the present day Depot, up until the early part of the 19th Century. The Sauk and Fox tribes became federally recognized as one tribe in 1885, which today is split into three separately recognized groups: Sac and Fox Nation of Missouri in Kansas and Nebraska, Sac and Fox Nation of Oklahoma, and Sac and Fox of Mississippi in Iowa (Callender 1978:636; U.S. Department of the Interior 1995). All three groups claim aboriginal land rights to the Northwestern Illinois region. Furthermore, the 1978 Indian Land Claims map (U.S.G.S. n.d.) shows the Sac and Fox as aboriginally residing in what is presently the geographic location of the Savanna Army Depot.

The last Native American group believed to have resided in the vicinity of the present day Savanna Army Depot was the Winnebago tribe. During the early 19th Century, Winnebago villages stretched from Lake Winnebago in Wisconsin to the Rock River in Northern Illinois. However, the Winnebago's tenure in the vicinity of the present Army Depot was not long lived. In 1829 the Winnebago were forced to relinquish the valuable lead-mining district to white settlers and were pressed northward into Wisconsin (Tanner 1987:139). This lead-mining district was bounded on the east and north by the Pecantonica and Wisconsin rivers, and on the west by the Mississippi, extending south of the Apple River (Tanner 1987:142), which is the southern border of the land in which the Depot is presently located.

SECTION 6 COMPLIANCE

P.L. 101-601 (NAGPRA) requires that federal agencies engage in active consultation with Native Americans with federally recognized tribes and/or lineal descendants who may be culturally affiliated with the archaeological collections from the installation. Enclosed are a draft NAGPRA Section 6 Summary letter (Appendix I) and a list of the tribal chairpersons from the federally recognized tribes (Appendix II) which may be culturally affiliated with the collections. Of the tribes referenced above, only the Sac and Fox, Kickapoo, Winnebago, and Miami are federally recognized.

Initial consultation should be conducted on a government-to-government basis. Refer to P.L. 101-601 (NAGPRA) for specifics on required Native American consultation and the legal definitions of items subject to NAGPRA.

APPENDIX I

DRAFT SECTION 6 SUMMARY LETTER FOR SAVANNA ARMY DEPOT, ILLINOIS

[Installation Header]

[Tribal POC Name]

[Title]

[Address]

[City, State, Zip]

Dear [Name of POC]:

I am writing to inform you of collections held by Savanna Army Depot that may contain Native American cultural items, as defined by the Native American Graves Protection and Repatriation Act (NAGPRA), that are, or are likely to be, culturally affiliated with the [Tribe]. Savanna Army Depot has documented these archaeological collections in a Summary in accordance with the requirements of Section 6 of NAGPRA.

Savanna Army Depot is responsible for collections that include approximately 160 catalogued artifacts housed at the Illinois State Museum in Springfield, Illinois. These archaeological collections were generated from surveys and/or excavations conducted during the 1930's. The collections consist of prehistoric stone tools, ceramics, and 27 bags of unanalyzed animal bone.

We are notifying [Tribe] because some of these materials were found in, or near the area thought to be part of the territory occupied or used aboriginally by the [Tribe]. In accordance with Section 6 of NAGPRA, we are inviting you to consult with us regarding these archaeological collections. Upon your written request, we will provide you access to review our records, catalogues, relevant studies, or other pertinent data for the purpose of determining the geographic origin, cultural affiliation, and basic facts surrounding acquisition and accession of these collections.

In the process of completing the Section 6 Summary, it has come to our attention that possible Native American human remains were identified in Savanna Army Depot's collections. Our research thus far indicates that human skeletal remains were encountered during the excavation of the Savanna Proving Ground Site, 11-Ca-1, by Robert Adams in 1932.

It is unclear whether these remains were collected by Adams. The catalog cards mention only animal bone, however fragmentary human remains may be discovered among the bone upon examination by a professional osteologist.

Therefore, we are also informing you of our need to make a physical examination of this collection in order to determine whether a Section 5 Inventory is necessary. By means of this letter we are also initiating consultation regarding NAGPRA Section 5. If necessary, the inventory of the Savanna Army Depot collection will be scheduled early in 1996. If [Tribe] wishes to comment on, or participate in the Section 5 Inventory, please respond within 60 days of receipt of this letter.

Please feel free to contact [Installation POC name] regarding any of these issues, at [telephone, address].

To facilitate discussions between Savanna Army Depot and the [Tribe] on these matters, please forward the name and method of contacting your tribal representative, traditional religious leader, or preferred NAGPRA point of contact. We look forward to working with you.

Sincerely,

[Commander's signature]

APPENDIX III

SUMMARY OF CURRENT LOCATIONS OF ARCHAEOLOGICAL COLLECTIONS FROM SAVANNA ARMY DEPOT, ILLINOIS

All collections information has been entered into a Paradox data base file and can be queried by any of the fields listed below, as well as by the name of the installation and by MACOM. The data base will be delivered by the MCX to the U.S. Army Environmental Center upon completion of the U.S. Army NAGPRA Compliance Project. Inquiries for additional information are welcome (MCX: 314-331-8865; U.S. Army Environmental Center NAGPRA Compliance Project: 410-671-1573). The data fields listed in the summary of collections contain the following information:

REPOSITORY:	The current location in which the collection is stored, as of the date of this report.
REPOSITORY POC:	The person contacted by the MCX, or the person to whom inquiries regarding the collection should be addressed.
TELEPHONE:	The telephone number for the repository POC.
COLLECTION ID:	The identifying unit used by the repository to store and/or locate the collection. This can be a unique accession number assigned by the repository, the archaeological site number or project name, the name of the collector of the collection, or another number or name assigned by the repository.
SITE NUMBERS:	The official site number or name only for those sites from which materials were collected. An investigator may have performed work at additional sites but did not collect any materials. Those site numbers are not included in this field.
FIELDWORK DATES:	The date(s) during which the investigation(s) occurred. This information is provided to differentiate between projects that may have investigated the same site repeatedly.
EXCAVATOR/COLLECTOR:	The individual and/or organization that conducted the investigation.

COLLECTION SIZE: The volume or number of objects in a collection, estimated by the repository POC or from project reports.

DESCRIPTION OF MATERIALS: General material classes of the objects in the collection derived from data provided on site records, in references, and/or by the Repository POC.

ANTIQUITY/ARCH. PERIOD: Chronological or cultural-historical designations recorded on site records or in references specific to the collection.

CULTURAL AFFILIATION: This column contains only those ethnic identifications found in the site records or references specific to the collection. This field is left blank if no such information was recorded.

BASIS OF DETERMINATION: Documents the source of the cultural affiliation information (e.g., site record, oral testimony, reference).

SECTION 5 MATERIALS: Describes the number and kind of human skeletal remains and associated funerary objects in the collection, as indicated by the site records, references, repository management documents, or information from repository POC. If these materials are present or are suspected to be present, NAGPRA Section 5 requires a physical inventory of the materials.

APPENDIX V

MCX LIST OF REFERENCES

In addition to the references reviewed by MCX personnel at the archaeological site information center, every attempt was made to obtain references cited but not on file. Information taken from these references was coded for data relating to collections made from sites located on installation property (see attached sample of PD-C Bibliographic Data Sheet form) and entered into a data base for ease of manipulation.

Report titles were drawn directly from the title page of reports, and consist of the following fields:

FIELD	DATA ENTERED
Subject Property	Army Installation name
Last Name	Primary author's last name
First Name	Primary author's first name
Middle Initial	Primary author's middle initial
Secondary Authors	Names of secondary authors, <i>or</i> in instances where the author is a company rather than an individual, the company name is listed here
Title	Title of the reference. For letter reports, the person or agency to whom the correspondence is addressed is listed as the title.
Series	If the report is part of a publication series, the name and number are provided here.
Date	Date of publication or submission
Length	Report length in pages
Contract Number	Contract number and delivery order number, if applicable

The data for the next three fields are drawn directly from the report title page and reflect the hierarchy of contracting agencies involved in accomplishing the work. In some cases, the sponsoring agency is listed as the Army installation; in others, the intermediary contracting agent, (e.g., the Army Corps of Engineers or the National Park Service) is listed as the Sponsoring Agency.

Sponsoring Agency	Agency for which the report was prepared
Contractor	The agent contracted to perform the work
Subcontractor	The agent subcontracted to perform the work

The majority of the citations for archaeological investigations on Army land refer to unpublished reports prepared under contract with federal agencies, consequently the MCX printout was designed to address these reports. In instances where the author is a company rather than an individual, the company name is listed in the Secondary Authors field (due to the length of the field). For published references, the publisher is listed in the Sponsoring Agency field.
